D. Social Betterment Organizations

Though Mr. Hubbard is best known for founding the religion of Scientology, he also authored very effective technologies for handling society's ills and bettering the lot of mankind as a whole. Over time these technologies have developed into four general social-betterment programs, each addressing a specific area of current social concern: Narconon, a drug rehabilitation program; Applied Scholastics, an educational program; Criminon, a criminal rehabilitation program; and a program for improving public morality in general based on a nonreligious moral code called "The Way To Happiness." The public has come to associate the

four names Narconon, Applied Scholastics, Criminon and The Way To Happiness with highly effective and successful programs to better society.

For many years CSI and other churches of Scientology have conducted highly-successful social reform programs based on Mr. Hubbard's technologies. They conducted these programs either directly or in close conjunction with charitable and educational organizations formed to help them bring Mr. Hubbard's technologies to the secular world. In addition to these technical organizations churches of Scientology support and work closely with several other charitable organizations that are active in various fields of public interest, particularly combatting psychiatric abuse and governmental corruption.

1. Association for Better Living and Education

The bulk of CSI's social betterment program is carried out under the supervision and direction of Association for Better Living and Education ("ABLE"), a California nonprofit public benefit corporation formed in

November 1988. ABLE's sole purpose is to improve society through the application of Mr. Hubbard's social betterment technologies. In general, ABLE promotes, funds and provides assistance to organizations that use L. Ron Hubbard's technologies in education, in rehabilitating drug abusers and criminals, and in raising public morality in general.

ABLE accomplishes its goals primarily by providing technical and financial assistance and general promotional support to the international social-betterment organizations that work in ABLE's four areas of concern: Narconon International (drug rehabilitation), Applied Scholastics (education), The Way To Happiness Foundation (public morality) and, though not yet incorporated, Criminon (criminal rehabilitation). These four international organizations, in turn, assist organizations that work in their respective fields at the local level.

ABLE is responsible for ensuring that the programs that use the names referring to Mr. Hubbard's

social-betterment technologies -- Narconon, Applied Scholastics, The Way To Happiness and Criminon -- meet the high standards of quality with which they have come to be associated. ABLE discharges this responsibility by permitting the international social-betterment organizations and local organizations to use the names subject to ABLE's ultimate supervision.

ABLE assists social-betterment organizations in other ways. It provides technical assistance when necessary to help them better achieve their program goals. It helps raise funding to support their charitable programs. It promotes their programs throughout society through the printed media as well as radio and television. It also will provide social-betterment organizations the physical facilities necessary to house their charitable and educational programs. A representative sample of an ABLE publication, INROADS MAGAZINE, is included as Exhibit 64.

ABLE is filing an application for recognition of its exemption under section 501(c)(3) concurrently with this application.

a. Narconon International

Narconon International is a nonprofit corporation that gives overall guidance and technical assistance and support to local organizations that use Mr. Hubbard's technology to rehabilitate drug users. Narconon -- meaning "non-narcosis" or "no drugs" -- started in the mid-1960s when a prisoner in the Arizona State Penitentiary applied principles expounded in one of Mr. Hubbard's books to solve his drug problem as well as the drug problems of many of his fellow inmates. This one-man crusade flourished into a grassroots movement that eventually moved from penal institutions out into society as a whole.

Today, the Narconon program has developed into a two-pronged assault on the world's drug problem: it encompasses an extraordinarily effective residential rehabilitation program as well as an objective, hard-

hitting public education program. At present, there are 33 residential Narconon centers in various countries, including the United States, Canada, Spain, Italy, Switzerland, France, Germany, Holland, Sweden, Denmark, and England. Current plans are to establish a Narconon center near each of the 100 largest cities in the world. The Narconon program of activities is described in detail in the attached booklets, Narconon, Drug Rehabilitation and Education Services, Narconon Chilocco New Life Center, and Narconon Drug Prevention & Rehabilitation Services 1992 Annual Report. (Exhibits 65, 66 and 67). Also see pages 407-417 of WHAT IS SCIENTOLOGY?, (Exhibit 9), for further information on the Narconon program.

Narconon International was formed in 1970 to formalize what was then a loose, grassroots movement, to help establish Narconon programs throughout the world, and to provide local centers the same sort of guidance and technical assistance and support that ABLE provides it. Narconon International also permits local centers to use the name Narconon. In exchange, local centers support Narconon International's program by providing it

with ten percent of the funds they receive in connection with their Narconon activities. Narconon International also runs a 26-bed rehabilitation center in Los Angeles under the name Narconon Los Angeles.

Narconon International has a group exemption ruling under section 501(c)(3) dated January 20, 1975, and the four Narconon centers now operating in the United States are exempt under this group ruling.

b. Applied Scholastics

Applied Scholastics has overall responsibility for furthering the application of Mr. Hubbard's educational technology throughout society as a whole. This technology consists of a number of very basic yet powerful principles of learning that Mr. Hubbard developed into a methodology for grasping any subject of study. This technology already is bringing about remarkable results throughout the world in improving the ability of individuals to learn and to apply what they learn. The technology has been translated into 12 languages and is in use in schools and by tutors in the
